

Adding Value to Your Team

Students in Guelph's the Food, Agricultural and Resource Economics (FARE) program acquire the analytical knowledge and skills needed to effectively deal with emerging issues in food, agriculture, and resource management. FARE students have a wide range of interests and skills that can be applied in many workplaces in government and non-governmental organizations, non-profit and community-based organizations, and the private sector.

University of Guelph Advantage

Guelph's FARE program teaches students to use economic theory and applied methods to improve food systems and policy in Canada and internationally. Building on business and economic skills through advanced projects and case-based courses students are able to specialize in one of four streams:

- Food and Agribusiness Management
- Food Industry Economics and Management
- International Agricultural Development Economics
- Resource Economics

Our co-op process responds to your needs. Employers can post, hire and interview throughout the semester and our students are available for 4 or 8 month work terms. The Experience Guelph hiring tool makes hiring Guelph co-op students easy!

Student Strengths

- Advanced analytical and management skills to effectively deal with emerging issues and challenges, such as food, security, and sustainability.
- Comprehensive understanding of economic theory and applied methods in both the Canadian and world context.
- Strong leadership and communication skills with experience in real-world case projects.
- Ability to handle and gather accurate economic data relevant to research problems.
